

## OUR FACULTY

UT Medical Center's Emergency Medicine Residency Program faculty members are leaders in their field. They serve as bedside teachers, mentors, didactic teachers, and scholarly project advisors.

Catherine A. Marco, MD

Dr. Catherine A. Marco, MD, FACEP, professor of surgery and director of the UT Emergency Medicine Residency Program, was named a "hero of emergency medicine" by the American College of

Emergency Physicians. Dr. Marco has practiced emergency medicine for more than 20 years. In addition, Dr. Marco is the director of the College of Medicine's medical ethics curriculum. A recipient of numerous research and education awards, she has published extensively and served on numerous editorial and administrative boards.

Kristopher R. Brickman, MD

Dr. Kristopher Brickman, MD, FACEP, is the chief of the Division of Emergency Medicine at the UT Medical Center. He recently served as president of the UT Faculty Senate. He has extensive administrative

experience in ED and prehospital arenas. Dr. Brickman's research interests include pain management, wound care and intraosseous infusion.

## ABOUT TOLEDO

The University of Toledo Medical Center is located in Toledo, Ohio, a medium-sized city 100 miles west of Cleveland and 50 miles south of Detroit, a major travel hub. The UT Medical Center is located on The University of Toledo's Health Science Campus in a residential neighborhood in south Toledo where living accommodations are plentiful and reasonable.

Popular recreational activities include boating and fishing on the Maumee River and Lake Erie, and enjoying one of Toledo's Metroparks.

Toledo also is home to the Mud Hens minor league baseball team, the nationally recognized Toledo Zoo and the world-renowned Toledo Museum of Art. In addition, Cedar Point Amusement Park – home of the most roller coasters in the world – is just 45 minutes away.

**MEDICAL CENTER**

## THE UNIVERSITY OF TOLEDO MEDICAL CENTER EMERGENCY MEDICINE RESIDENCY

The University of Toledo Medical Center's Emergency Medicine Residency program is a distinguished program with a unique focus on international emergency medicine.

The program is based at The University of Toledo Medical Center and also includes rotations at St. Luke's Hospital, an independent community hospital less than 10 miles from the medical center. Both institutions serve diverse and complementary patient populations with adequate learning opportunities to see a wide breadth of disease and trauma presentations, and ample opportunities for leadership, patient management, teaching, and procedural skills.

We have on faculty some of the nation's renowned experts in disaster preparedness, a focus that is interwoven throughout the three-year program. Residents will gain the tools to help them become leaders in developing disaster programs and managing EMS and disaster systems.

## INTERNATIONAL EMERGENCY MEDICINE ELECTIVE

Our residents participate in an international experience that will provide them with a hands-on framework of the global development of emergency medicine and the issues and problems that affect our specialty worldwide.

Electives in China, India and other locations are available.

## ADMINISTRATIVE MANAGEMENT

Another unique area of focus of the Emergency Medicine Residency Program at The University of Toledo Medical Center is a specific focus on administrative management. Understanding reimbursement systems among various health-care providers and the administrative components of Emergency Department management allows our residents to become leaders in emergency medicine for the future.

## SIMULATION LAB

Residents in the Emergency Medicine Training Program have access to a state-of-the-art simulation lab that provides a vast array of procedural training relative to emergency medicine encompassing pediatrics, airway, vascular and surgical procedures. A new simulation lab features the most advanced patient and procedural simulators available.

## ACADEMICS

In the academic arena there is a major focus on resident teaching and supervision. Specifically by the third year of residency training, emergency medicine residents at UT Medical Center are expected to supervise and manage medical students and junior residents in the Emergency Department, in the Simulation Lab and in Research activities.

So whether your aspirations are to work in an academic setting, become an Emergency Department Medical Director, or to manage your own Emergency physician group, our program will provide the tools necessary to reach these goals.
